REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach and/or suggest a process for testing a continuously variable transmission component comprising, in combination with the other recited steps, measuring by non-destructive inspection the size of non-metallic inclusions in a region from the surface of at least one of an input disk and an output disk.

The prior art either teaches testing a rolling bearing or a rolling bearing race or destructively testing the steel before the input/output disk is formed. There is no teaching of testing the input disks and output disks of a continuously variable transmission (CVT) for inclusions within a specific depth from the surface of the disk, determining the size of the inclusions within that depth, and from the size of the inclusions, determining the acceptability of the input/output disk based upon the size of the inclusion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mitamura et al. (US 6,165,100) teaches destructively measuring the cleanliness of the steel in which the input disk, output disk, and/or power roller is formed.

Yoshikawa et al. (US 6,443,870) discloses setting the amount of carbon found in the input disk or output disk.

Falsetti et al. (US 7,017,414 B2) teaches ultrasonically inspecting turbine wheels but does not perform the "depth" testing required by the claimed invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rose M. Miller whose telephone number is 571-272-2199. The examiner can normally be reached on Monday - Friday, 7:30 am to 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on 571-272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
